**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Neil K. Nydegger (Reg. No. 30,202) on October 14, 2004.

The application has been amended as follows:

1. (Currently Amended) A method for using a system to conduct encrypted commercial transactions with an encrypted file in e-commerce on the Internet which comprises the steps of:

creating said file, on the Internet, with said file having a first part and a second part;

encrypting said first part of said file with a first private key, wherein said first part of said file includes a second private key;

encrypting said second part of said file with said second private key;

decrypting said first part of said file with said first private key in response to a commercial transaction between a seller and a buyer;

retrieving said second private key from said first part; and

decrypting said second part of said file with said second key to complete the transaction.

16. (Currently Amended) A method for using a system to conduct encrypted commercial transactions between a buyer and a seller, wherein said method involves a transaction agent and comprises the step of:

presenting a file, said file being created, on the Internet, by the seller and containing at least an overhead and a content, with said overhead being encrypted with a first private key and said content being encrypted with a second private key; and

decrypting said content of said file by employing said second private key to reveal said content of said file by employing said second private key to reveal said content of said file for use by the buyer to complete a commercial transaction between the buyer and the seller.

***Allowable Subject Matter***

2. Claims 1, 3-10, 16-20 are allowed.

***Reason for Allowance***

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is U.S. Publication No. 2002/0112171 to Ginter et al.

Ginter et al. disclose creating a file, said file having a first part (i.e. permission record/PERC") and a second part (i.e. "content"), encrypting the first part with a first private key and encrypting the second part with a second private key; wherein, the first part contains

Art Unit: 3621

decryption keys. Ginter et al. taken either individually or in combination with other prior art of record fails to teach or suggest retrieving said second private key from said first part as recited in independent claim 1 and decrypting said content of said file by employing said second private key to reveal said content of said file for use by the buyer to complete a commercial transaction between the buyer and the seller as recited in independent claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- "The Secure Distribution of Digital Contents" by Faber et al. discloses the structure of encrypted contents, which includes a header, message authentication code and encrypted contents.
- International Publication NO. WO 00/14918 to Garrison discloses a method for encrypting data messages, the message including an encrypted header.
